Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Claims 1, 5-7, 9, 11 and 14-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Johnson.

In regard to claims 1, 9, 11, 17 and 18, the Johnson reference discloses in combination a "beverage container" 54 and a "device" 10 having an "outlet" 40 and a "connector" 48, as claimed.

In regard to claims 5 and 14, see inclined "inner wall" 32.

In regard to claims 6 and 15, see "outer sleeve" 50.

In regard to claims 7 and 16, see "manually graspable member" 52.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Johnson in view of Onders et al.

Art Unit: 3751

The Johnson reference discloses the invention substantially as claimed, but does not disclose a drain conduit extending into a beverage container interior. The Onders et al. reference discloses another drainage device having a drain conduit 38 for draining material directly into an offset opening of the container. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the Johnson device to have an eccentric drain conduit capable of extending into a container with an offset opening in view of the teachings of the Onders et al. reference in order to directly drain material into the offset opening of the container.

Allowable Subject Matter

Claims 2-4, 8, 10 and 13 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Hannah reference pertains to a drainage device having an eccentric drain conduit, similar to Applicant's device.
